

Weighing and Radio Technology

Radio Remote Controls

Vetec 20.0t

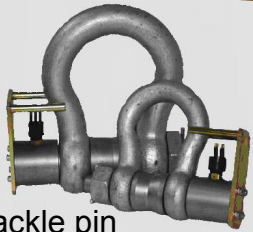

Vetec manufacture safety equipment for cranes and other lifting devices.

Among the products are customized load pins, wire-mount WT-1 and WT-2 load cells, Dynamometers and overload relays.

System solutions included a wide range of displays in different sizes with linearization function for obtaining a high accuracy. Such solutions can include overload relays for cut-off function for a crane safety function.

Vetec offer a wide range of Radio remote controls and Joysticks for crane control and other industrial equipment.

Shackle pin

WT-1

WT-2

Load pin

OL_3000 Relay

Display

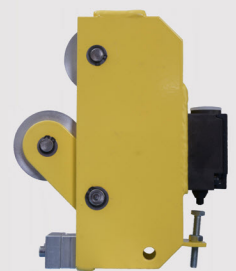

WT-1 or WT 2 are easy to mount.
Load pins provide a higher accuracy.
Overload relay has two cut-off outputs.
Display with linearization function.

Solution for twin crane with 3 displays.
Individual load readout and summarization readout for total load.

The system also includes overload relays for cut-off function.

Mechanical Overload Switch.

Customized Weighing Solutions and Radio Remote Controls for

Cranes - Marine - Conveyor belts - Gates - Wind Power - Lifts - Automation
